Doug,

A couple of minor comments, nothing substantive:

(1) Procedure 3-26(A) refers to "healthcare" employees (one word); Procedure 3-27 refers to "health care" employees (two words).

(2) The first part of Procedure 3-27 has the same two sentences that appear again in Procedure 3-27(B). Namely, "Non-exempt employees paid on a biweekly or monthly pay cycle must be paid overtime . . . Biweekly employees must be paid . . ." It appears to me that the new sentences should not be included in 3-27(B) as that subsection relates to "compensatory time in lieu of monetary payment."

(3) You don't see this in the Redline version, but in the "Changes Accepted Version," there are two periods in a row after the word "paid" about half way through Procedure 3-27(B).

(4) Procedure 5-17. I suggest the word "is" be added before the word "calculated." (Note: the word "calculated" appears three times in the first part of Procedure 5-17. The word "is" appears before the first and third uses of the word "calculated" but does not appear the second time the word "calculated" is used.)

Let me know if you have any questions. Thanks for the opportunity to comment!
